Basic Skills - iPad Film Making

The Basic Skills Professional Development one day workshop, provides teachers with the fundamentals of filmmaking using iPads, to ensure the easy integration and implementation of digital technologies to create texts.

By the time they graduate from Year 6, a primary school is expected to have given its students the skills, knowledge and understanding to compose, edit and present well-structured and coherent texts. This includes the ability to use digital technologies to create texts. Our aim is to provide your teachers with the foundation to incorporate these skills effectively into the mandatory use of digital technologies whilst adhering to the new 21st century curriculum.

We look at all the major aspects of creating digital texts including:

- Creating an imaginative and creative space
- How to extract and foster an idea
- Camera Skills
- Cast and Crew - Roles and responsibilities
- Tips and Tricks
- Edit like a Pro

During this professional development teachers will develop, shoot and edit their own films to ensure a thorough understanding of the collaborative process. It is impossible to make you professional filmmakers by the end of this course but we will make you the best filmmaking teachers around.

Green Screen

In addition to the hardware you receive in your My School Studio you are also entitled to the invaluable Green Screen Professional Development Workshop. During this one day tutorial your teachers will discover all of the tips and tricks when working with the green screen and how to get the most out of it with and for your students.

Over the course of the one day development day your teachers will;

- Learn about the iPad app that makes the magic happen
- Understand the fundamental elements needed to effectively use the green screen
- Discover how to import backgrounds from various locations and create your own backgrounds
- Understand which background to use and when for the greatest effect
- Develop basic filmmaking skills to adequately and effectively use the green screen, such as; screen shots, ideal framing and sound
- How to use the studio for 21st century learning, such as; collaboration, communication, critical thinking and creativity
- Basic idea of how to integrate the studio into your curriculum saving you time
- How to use the green screen as an assessment strategy

The Green Screen Professional Development day is an interactive, informative and engaging workshop for your teachers that will provide them with the necessary skills and encouragement to get the most out of your new My School Studio.

Integrating the Curriculum

Once you have mastered the basic skills of filmmaking it is time to integrate the process and product in to your entire curriculum. The Professional development day provides your teachers with the tools necessary to discover and develop a filmmaking project within any key learning area.

Using smart devices the opportunities are endless and the students' engagement with a topic or subject deepens dramatically. This workshop introduces teachers to the endless opportunities available when using filmmaking in the classroom and provides them with practical examples for existing units of work in every KLA.
